

Daily Cleaning Checklist for Ill Resident Rooms during an Outbreak

Date:	Time of Clean:	Initials:
--------------	-----------------------	------------------

N/A	YES	Resident Room Area – Horizontal / High Touch Surfaces
		Tables and chairs
		Bed rails and head / foot boards
		Call bells
		Telephone / TV remote
		Work surfaces / counters
		Door knobs
		Sink and faucet
		Light fixtures and cords
		Soap and hand sanitizer dispensers
		Dedicated Equipment in Room
		Wheelchair / walker
		Lift
		Other (e.g., oxygen machine, IV poles)
		Resident Bathroom Area*
		Hand rails
		Door knobs
		Light switch
		Counter, sink and faucet
		Commode / toilet / flush handle
		Floors and Walls
		Floors do not require special cleaning procedures
		Clean any visible soiling on walls

*In an enteric outbreak, if the toilet used by the ill resident is shared with other residents, the bathroom area should be cleaned and disinfected after each use by the ill resident.

Please follow the directions below:

- Prior to entering room, perform hand hygiene and wear appropriate personal protective equipment (PPE) as posted on resident's door. Discard PPE appropriately before leaving the room and perform hand hygiene
- Items and surfaces should be cleaned first and then disinfected
- Work from cleanest areas to the dirtiest areas of the room
- Use a general virucide disinfectant with a claim against non-enveloped viruses:
 - Ensure cleaning cloths are fully saturated prior to disinfecting surfaces
 - Use bucket and rag system (do not spray disinfectant solution onto surfaces)
 - Only dip cleaning cloths into disinfectant solution once
 - Change cleaning cloths frequently (never use a cloth in more than one room)
