Date Board of Health became aware of IPAC lapse (yyyy/mm/dd) 2022/06/07	Date of Initial Report posting (yyyy/mm/dd) 2022/06/10
Date of Initial Report update(s) (if applicable) (yyyy/mm/dd) 2022/07/19	How the IPAC lapse was identified Complaint

Summary Description of the IPAC Lapse

As a result of a complaint received on June 2, 2022, York Region Public Health conducted an initial inspection at the premise on June 3, 2022, with a follow-up inspection conducted on June 07, 2022. York Region Public Health noted concerns with reprocessing of re-usable non-critical and semi-critical equipment/devices. Operator failed to ensure disinfectants are used per manufacturers' instructions for use (MIFU) for non-critical and semi-critical items. Operator failed to ensure reprocessing sink is dedicated. Within reprocessing area, the operator failed to ensure there is a one-way workflow from dirty to clean to prevent cross-contamination. Operator failed to ensure that the reprocessing of all equipment/devices is conducted in an area away from where personal services are being provided. Appropriate types of PPE were not provided within the reprocessing area.

IPAC Lapse Investigation	Yes	No	N/A	Please provide further details/steps
Did the IPAC lapse involve a member of a regulatory college?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
If yes, was the issue referred to the regulatory college?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
Were any corrective measures recommended and/or implemented?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

Please provide further details/steps	<ul style="list-style-type: none"> At the time of inspection, operator was educated on correct infection prevention and control (IPAC) practices. Operator to ensure that for all re-usable equipment/devices that require reprocessing, a reprocessing process used is in accordance with the Provincial Infectious Diseases Advisory Committee (PIDAC) best practices. Operator to ensure there is to be at least one dedicated reprocessing sink in the personal service setting. Operator to ensure that the reprocessing of all equipment/devices is conducted in an area away from where personal services are being provided. Operator to ensure re-usable equipment/devices are fully immersed into disinfectant solution for the appropriate contact time as per manufacturers' instructions. Operator to ensure disinfectants are used per manufacturer's instructions for use for non-critical items.
