York Region

Convalescent care

Following an accident or illness, you may be ready to leave the hospital but not yet able to return home safely.

Convalescent care is a short-term service that provides you with the time you need to recover and resume your normal activity level before returning home. All the services available to long-term care residents are available to clients staying in the convalescent care beds.

Cost

Care and accommodation are provided at no cost. Additional fees are required for telephone and internet services.

Eligibility

Convalescent care is available to York Region residents while they recover from an accident or illness. Residents are eligible to receive up to 90 days of convalescent care in one of our long-term care homes.

How to apply

To see if you are eligible for a convalescent care bed, please contact Home and Community Care Support Services (1-888-470-2222 or 310-2222 - no area code required). Your care coordinator will assess your needs and determine if convalescent care is right for you. If you are not eligible, your care coordinator will help you find other services in the community to meet your needs.
