

HIGHWAY 7 CORRIDOR AND VAUGHAN NORTH-SOUTH LINK Transit Improvements Environmental Assessment (EA) Subway Alignment Selection Report

Steeles West Station

The station facilities shown opposite were developed in the TTC Spadina Subway Extension EA study assuming that Steeles West would be the terminal station on the extension.

The facility requirements are now being reviewed in the context of the provincial decision to fund a subway extension to VCC (i.e. Steeles West is no longer a terminal station.)
