

NOTICE OF STUDY COMMENCEMENT

CLASS ENVIRONMENTAL ASSESSMENT STUDY FOR

SUTTON WATER SERVICING

TOWN OF GEORGINA

The Regional Municipality of York (York Region) is planning to expand the existing Regional water system to meet growth demand in the community of Sutton, in the Town of Georgina. This project is proceeding in accordance with Ontario's *Growth Plan for the Greater Golden Horseshoe*. York Region's Water and Wastewater Master Plan Update (November 2009) identified the need to extend the existing Regional watermain on Metro Road North into the Sutton Community.

York Region has initiated a Schedule B Class Environmental Assessment study (Class EA) for this project under the Municipal Class Environmental Assessment (October 2000, as amended 2007) under the *Environmental Assessment Act*. The purpose of this Class EA study is to determine the preferred solution for expanding the water distribution system to accommodate projected growth in the area.

Consultation with and input from the public and government review agencies are vital components of the Class EA. Members of the public and review agencies are invited to provide input and comment for incorporation into the overall planning and design of the expanded water distribution system. Additional notices will be advertised as the Class EA progresses.

The Class EA study will proceed over the coming months. Subject to the results of the Class EA and the receipt of necessary approvals, it is anticipated that the implementation of the preferred solution may begin as early as summer 2013.

As part of the consultation process, a mailing list for notification purposes is being compiled. If you wish to receive further information about this project, submit a comment or be added to the mailing list, please contact:
