

NOTICE OF STUDY COMMENCEMENT

MUNICIPAL CLASS ENVIRONMENTAL ASSESSMENT STUDY WEST VAUGHAN SEWAGE SERVICING City of Vaughan

In November 2009, The Regional Municipality of York (York Region) completed the Water and Wastewater Master Plan Update which identified the need for additional servicing capacity for the West Vaughan area (the Project) to meet the future anticipated growth demands until the year 2051.

York Region has therefore initiated a Municipal Class Environmental Assessment study (Class EA) under Schedule C of the *Municipal Class Environmental Assessment* document (October 2000, as amended in 2007). The Class EA undertaking will identify and evaluate feasible servicing alternatives for the West Vaughan area, including a sewage servicing plan.

The study area includes locations to be considered for the service area, the existing servicing infrastructure (within York Region) and alternatives for the trunk sewer and forcemain routing configuration. The study area boundaries are conceptual and may be subject to change as the Class EA progresses. The service area generally consists of the area west of Highway 27 (Northwest Vaughan) and the Kleinburg area, as shown in the map below.

The Class EA is currently scheduled for completion by July 2012. Consultation with and input from the public and government review agencies will be a vital component of the Class EA. Members of the public and review agencies are invited to provide input and comments for incorporation into the overall planning and design of the Project.

As part of the consultation process a mailing list for notification is now being compiled. If you wish to receive information, submit a comment, or to be added to the mailing list, please contact:
