

Healthy smiles Ontario

Oral health is connected to overall health. Regular dental care can prevent cavities and other dental problems that can lead to diseases later in life. The Healthy Smiles Ontario program has no direct cost and helps eligible children to have regular visits (check-ups, fillings, x-rays and more) with a dentist or dental hygienist.

Children 17 years of age and under may be eligible if:

- They are residents of Ontario
- Their Adjusted Family Net Income is \$20,000 or less
- They do not have any other form of dental coverage

Parents will need to show specific documents as part of the enrolment process. To find out more about the Healthy Smiles Ontario program visit www.ontario.ca/healthysmiles and call York Region Health Connection to book an application appointment.

For health-related information call York Region *Health Connection* at 1-800-361-5653, TTY 1-866-252-9933 or visit www.york.ca/teeth
