

The Regional Municipality of York

**NOTICE OF COMPLETION OF ENVIRONMENTAL STUDY REPORT**

**CLASS ENVIRONMENTAL ASSESSMENT**  
**Expansion of the Sutton Water Pollution Control Plant**  
**Communities of Sutton and Jackson's Point, Town of Georgina**

The Regional Municipality of York (York Region) has completed a Class Environmental Assessment (Class EA) for the expansion of the Sutton Water Pollution Control Plant (WPCP), which services the communities of Sutton and Jackson's Point in the Town of Georgina. The location of the Sutton WPCP is shown on the map below:

The purpose of this Class EA study was to investigate expansion alternatives for the Sutton WPCP to provide increased servicing capacity to accommodate future approved growth in the communities of Sutton and Jackson's Point. The study has been conducted in accordance with **Schedule C** of the Municipal Class Environmental Assessment (October 2000, as amended in 2007) under the Ontario *Environmental Assessment Act*.

Subject to the comments received as a result of this Notice and the receipt of other approvals as necessary, York Region intends to proceed with the detailed design and construction of this project.

An Environmental Study Report (ESR) has been prepared for this project. The ESR describes the problem, assesses the alternatives and describes the preferred solution, as well as the public and agency consultation program conducted during the study. The expansion of the Sutton WPCP on the existing site has been selected as the preferred solution and alternative design concepts have been identified, investigated and evaluated in terms of their potential impacts.

This Notice places the ESR on public record for review and comment. Copies of the report are available for public review at the following locations during regular business hours of each location:
