

NOTICE OF NEIGHBOURHOOD INFORMATION SESSION

CLASS ENVIRONMENTAL ASSESSMENT STUDY ORCHARD HEIGHTS BOOSTER PUMPING STATION Town of Aurora

Project Background

The Regional Municipality of York ("York Region") is planning to increase the existing capacity of the Orchard Heights Booster Pumping Station, located on Orchard Heights Boulevard in the Town of Aurora (see attached key map).

York Region has initiated a Class Environmental Assessment study for this project under **Schedule B** of the Municipal Class Environmental Assessment (October 2000, as amended in October 2007). York Region's Water and Wastewater Master Plan Update (November 2009) indicated the existing pumping station capacity requires expansion to adequately service future system demands.

How to Get Involved

Members of the public and review agencies are invited to a Neighbourhood Information Session (NIS) to provide input for incorporation into the overall planning process. This will help to determine a recommended solution for increasing the existing capacity of the Orchard Heights Booster Pumping Station.

Representatives from York Region and the project study team will be present to provide both background information and details of the alternatives being considered to date. The NIS will be held:

Date: Thursday, March 4, 2010
Time: 6 p.m. to 9 p.m.
Location: Aurora Community Centre
1 Community Centre Lane, Aurora, ON

For additional information, please contact the Project Managers listed below. If you are unable to attend the NIS and wish to provide comment, or if you would prefer to provide comment prior to the NIS, please contact:
