

ECONOMIC and DEVELOPMENT REVIEW MID-YEAR 2008

YORK REGION MID-YEAR HIGHLIGHTS

REPORT *Highlights*

- In the first half of 2008, York Region's population grew by 14,500 people to reach 997,600
- The Region's unemployment rate in June 2008 was estimated at 5.8% - lower than the GTA, Province, and National unemployment rates
- The number of residential resales were down by 15.8% and the total value had decreased by 10.9% from the previous year, resulting in just over 7,800 resales and a total value of \$3.5 billion. Despite these decreases, 2008 remains among the top recorded years
- With 4,669 permits, York Region was ranked 4th across Canada for the number of new residential units with permits issued during the first half of 2008
- The Region's total estimated value of construction totalled \$1.5 billion by mid-year 2008, a decrease of 14.2% from mid-year 2007; ICI construction accounted for \$439 million by mid-year 2008, a decrease of 13.5% from mid-year 2007
- By mid-year 2008, York Region had 3,389 housing starts, a decrease of 42.6% from mid-year 2007, and 4,764 housing completions, an increase of 2.8%
- As of June 2008, semi-detached, town/row/attached, and apartment/condominium units accounted for 29% of the Region's total housing stock

1. POPULATION

York Region's Population Growth

Since York Region's creation in 1971, its population has risen dramatically. In just over 35 years, the Region's population has increased nearly sixfold, from 169,000 to 997,600 by June 2008 (Table 1). Over the last few years, the Region has experienced annual growth rates between 3 - 4%, equivalent to roughly 32,000 people per year. As illustrated in Figure 1, population growth during the first half of 2008 was similar to growth experienced in recent years. Based on this rate of growth, the Region appears to be on track with the Regional forecast for 2008 of approximately 1,013,100 people by year-end.

York Region Population: 6 Months Growth
Year-End 2007 - Mid-Year 2008
(TABLE 1)

	Year-End 2007	Mid-Year 2008	Population Increase	Change (%)
Aurora	50,500	51,100	600	1.2%
East Gwillimbury	23,000	23,100	100	0.4%
Georgina	46,300	46,600	300	0.6%
King	20,450	20,450	-	0.0%

Note: *July to December 2008 values are based on population forecasts.

All of the nine local municipalities within York Region continue to experience population growth, with the urban southern half receiving the largest population increases (Figure 2). By mid-year 2008, the largest increases in population had occurred in Markham (5,200 people), followed by Vaughan (5,150 people), and Richmond Hill (1,350 people) (Figure 3).

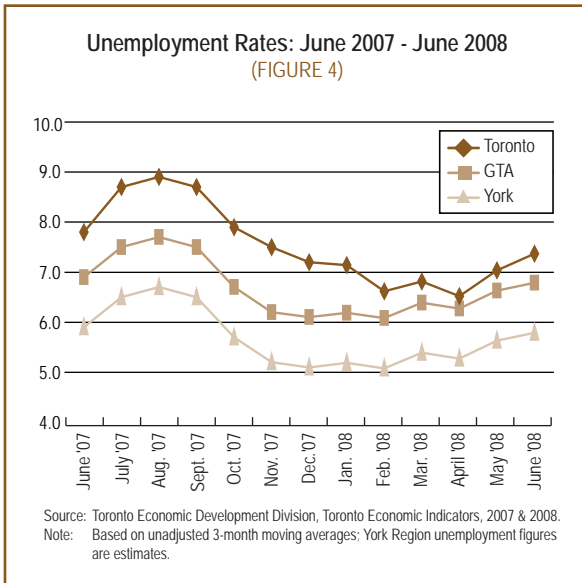

2. ECONOMIC ACTIVITY

Labour Market Conditions

Statistics Canada estimates that between June 2007 and June 2008, approximately 290,000 new jobs have been created within Canada. Canada's unemployment rate in June 2008 was 6.0% - consistent with that recorded one year earlier.

The unemployment rate in Ontario for June 2008 was higher than the national average, but at 6.5% was also consistent with that recorded one year earlier.

The City of Toronto's unemployment rate decreased from 7.8% in June 2007 to 7.4% in June 2008. The GTA's unemployment rate also decreased from 6.9% to 6.8%.

Human Resources and Social Development Canada estimates put York Region's historical unemployment rate at 1 - 2% lower than the GTA. Thus, York Region's unemployment rate in June 2008 was approximately 5.8% - slightly lower than the 5.9% recorded in June 2007 (Figure 4). York Region's low unemployment rate can be viewed as an indication of a strong and diverse economy.

3. PROPERTY MARKET

Residential Property Market

The Toronto Real Estate Board's Market Watch Report tracks home resales across the GTA. The report notes that the number of resales in 2008 has decreased from last year's record breaking numbers. However, it should be noted that the number of resales that occurred by mid-year 2008 still ranks among some of the best selling mid-year periods to date. The Toronto Real Estate Board sees the market slowly shifting towards a better balance between sellers and buyers, after several years of favouring sellers. The number of resales that occurred from January to June 2008 in York Region totalled over 7,800 units (Table 2). The total value of resales reached nearly \$3.5 billion - second only to 2007's record breaking value. These represent decreases of 15.8% and 10.9%, respectively, from mid-year 2007.

Multiple unit dwellings consist of semi-detached, row/town/attached, and condominium/apartment units. The resale of multiple unit dwellings in York Region totalled just over 3,000 units between January and June 2008. This represents a decrease of 8.1% (265 units) from last year's mid-year period. Of all the residential resales that occurred in York Region during this period, 38.3% were multiple unit dwellings. In 2007, 35.1% of all resales were multiple unit dwellings.

Table 3 compares the number of resales and the average price of single detached dwellings in each municipality during the first six months of 2007 and 2008. While the total number of resales decreased by 20.0%, the average price increased by 8.3%.

Industrial Property Market

Cushman & Wakefield LePage tracks the industrial market in five of the nine area municipalities in York Region: Aurora, Markham, Newmarket, Richmond Hill and Vaughan. According to Cushman & Wakefield LePage, the total inventory of industrial buildings in York Region increased by 3.2% between the second quarters of 2007 and 2008. The Region's vacancy rate fluctuated throughout the year, finishing the second quarter of 2008 at 5.8% - a slight increase from the 5.2% recorded in the second quarter of 2007 (Table 4).

Commercial/Office Property Market

CB Richard Ellis tracks three different office nodes in York Region: Markham North & Richmond Hill, Steeles/Woodbine, and Vaughan. At the end of the second quarter in 2008, the vacancy rates of these nodes ranged from 5.4% in Steeles/Woodbine to 8.7% in Markham North & Richmond Hill. The vacancy rate for the GTA at the end of the second quarter in 2008 was 6.7%. When compared to the second quarter of 2007, the vacancy rate fell in all areas except for Vaughan, with 5.5% in 2007 and 6.5% in 2008 (Table 5).

According to CB Richard Ellis, it is anticipated that within York Region, along with the surrounding GTA, office market activity will continue to slow because of global economic conditions. However, some have speculated that due to the current tight vacancy, market activity will remain relatively healthy.

At the end of the second quarter of 2008, the lease rates per square foot in York Region ranged from \$13.29 (Steeles/Woodbine) to \$17.56 (Vaughan). All of these lease rates increased in value from the same period last year. The office market lease rate for the GTA also increased, from \$15.00 per square foot in the second quarter of 2007, to \$16.75 per square foot in 2008 (Table 6).

4. BUILDING ACTIVITY

Residential Building Permits

Building permit activity is a standard indicator of local investment and economic performance. In the first half of 2008, York Region experienced a 22.1% decrease over the first half of 2007 in the number of new residential units with permits issued. However, this is still higher than the number of new residential units with permits issued in the latter half of 2007 (Table 7).

Building permits were issued for over 20,000 new residential units in the GTA between January and June 2008. Permits issued within York Region accounted for 23% of these units. Within the GTA, York Region had the second highest proportion of new units with permits issued, behind the City of Toronto. This is consistent with recent years, with the exception of 2007 where York Region placed first. The shares of other Regions in the GTA, including Durham (9%), Halton (17%), Peel (19%), and Toronto (32%), are displayed in Figure 5.

York Region is among the top municipalities across Canada for the number of new residential units with permits issued during the first half of 2008 (Table 8). It must be noted that this ranking is in comparison to cities, regions, and regional districts as defined locally. In recent years, York Region has ranked 6th, 3rd, and 4th at the mid-years for 2006, 2007, and 2008, respectively.

Construction Value

The value of construction that occurred within the Region during the first half of 2008 reached \$1.5 billion - a value 14.2% lower than that recorded in the first half of 2007. However, 2007 was a record breaking year, and when compared to previous mid-years the first half of 2008 ranks similarly to 2006. Table 9 shows the value of construction experienced by each municipality, broken down by the various sectors. The industrial sector was the only sector to experience an increase in its value of construction over last year's mid-year figures. Despite the decrease in total construction value within the Region, the proportion of residential to ICI sector construction remained consistent with previous mid-years. In 2008, ICI sector construction accounted for 29.1% of the total value of construction - a slight increase from last year's 28.9%.

Number of New Residential Units with Permits Issued in York Region: January 2007 to June 2008

**Agricultural permits are included under the industrial category.

ECONOMIC and DEVELOPMENT REVIEW MID-YEAR 2008

YORK REGION MID-YEAR HIGHLIGHTS

When compared to other cities, regions, and regional districts as defined locally, York Region consistently ranks among the highest values of total construction (Table 10). In the first half of both 2007 and 2008, York Region held the 4th highest total value across Canada.

A number of large scale construction projects have occurred within York Region during the first half of 2008. Table 11 is a list of the 20 highest valued building permits. This list includes projects from four different municipalities and all economic sectors, demonstrating that the construction industry is not reliant upon a single economic sector or one particular area of the Region.

Cross Canada Comparison Mid-Year 2008: Values of Total Construction (\$000's)

(TABLE 10)

Housing Completions

A total of 4,764 houses were completed within York Region during the first six months of 2008. In comparison, 4,636 homes were completed during the first half of 2007 (Table 13). This represents an increase of 2.8% over the previous year, which was greater than last year's increase of 0.2%. The proportion of these completions that were multiple unit dwellings also increased. By mid-year 2007, 45.0% of housing completions were multiple unit dwellings. By mid-year 2008, this had increased to 48.3% (Figure 6).

ECONOMIC and DEVELOPMENT REVIEW MID-YEAR 2008

YORK REGION MID-YEAR HIGHLIGHTS

Residential units can be tracked throughout their construction cycle - from issued permits to starts to completions. A comparison of residential units in this cycle during the first half of 2007 and 2008 is illustrated in Table 14.

As the percentage of single detached units has decreased, more housing choice has become available to the residents of the Region. As of June 30, 2008, 29% of York Region's total housing stock was made up of multiple unit dwellings - 6% semi-detached, 11% row houses, and 12% apartment units (Figure 8).

This is an encouraging trend, as the Region seeks to provide more housing options for its diverse population. The trend towards higher density development should also result in a more efficient land use pattern.

**Mix of Total Housing Stock in
York Region as of Mid-Year 2008**

(FIGURE 8)

Housing Diversity

As outlined in the Region's Housing Supply Strategy, one of York Region's key goals is to encourage the further diversification of its housing stock. A balanced mix of housing types would ensure that the needs of the Region's workers and residents are better met. Although the Region's housing stock is composed primarily of single detached dwellings, the stock is becoming increasingly diversified.

For example, in the last ten years, the proportion of single detached dwellings has fallen from 80% of the total housing stock to 71%. This percentage varies considerably between the various local municipalities. The highest proportion of single detached dwellings occurs in King, at 93%, with the lowest proportion occurring in Newmarket, at 62% (Figure 7).
