

HOUSING PROVIDER BULLETIN

MICROSOFT'S INTERNET EXPLORER 7 IS **NOT COMPATIBLE WITH YARDI**

Microsoft has recently released Internet Explorer 7 (IE7) which may be downloaded onto existing computers to upgrade their systems. IE7 will also replace Internet Explorer 6 as one of the applications included on new computers.

The Housing Access Unit has been informed that IE7 is not compatible with YARDI and may impact the ability of housing providers to access their waiting list.

We recommend that housing providers do not upgrade their Internet Explorer to IE7 at this time. If you have already downloaded IE7, or will be purchasing a new computer, you will need to install Internet Explorer 6 in order to access your waiting list.

If you require further information or need assistance, please contact Helen Aston, Supervisor Housing Access Unit at 905-830-4444 Ex. 5770, or by email at helen.aston@york.ca.
