

NOTICE OF PROJECT

**NEW WATERMAIN ALONG ELGIN MILLS ROAD FROM ENFORD ROAD TO BAYVIEW AVENUE
Town of Richmond Hill**

The Regional Municipality of York (York Region) is planning a new watermain on Elgin Mills Road (Watermain Project), from Enford Road east to Bayview Avenue in the Town of Richmond Hill (see key map below). The Watermain Project is required to reinforce the Pressure District 7 (PD7) System in the Towns of Richmond Hill and Markham and provide additional reinforcement to the Region's Water Supply System.

The Watermain Project was identified as a priority in York Region's Long Term Water Supply Master Plan (updated April 2004) and Water and Wastewater Master Plan (updated November 2009). This project qualifies as a Schedule "A+" project as described in the Municipal Engineers Associations "Municipal Class Environmental Assessment" document (June 2000, as amended September 2007; "MEA Municipal Class EA"). Due to the minimal environmental impacts that may be associated with this project, no formal environmental assessment process is required to be completed. However, it is a requirement of the MEA Municipal Class EA that the public receive notice of the project.

York Region invites your written comments for consideration and any input on the Watermain Project. Please forward your questions and comments to the project manager listed below:
