

# HANDWASHING REMINDERS

GermS can be spread through shared toys, on surfaces and playing closely with others. Handwashing is one of the most important ways to stop the spread of germS. About 80% of common infectious diseases are transferred by hands alone. Teaching your children proper and timely hand hygiene, either by washing hands with soap and water or using hand sanitizer, is an easy and effective way to help stop the spread of illness. It is also important to remind children not to touch their face with unwashed hands.

## Follow these simple tips to help your child wash away germS:

- Have your child sing the ABCs song for 15 seconds while scrubbing their hands with soap and water
- Hand sanitizer should only be used when hands are NOT visibly dirty and soap and water are not available
- When hands are visibly dirty and soap and water are not available, use moistened towelettes followed by hand sanitizer
- Children should be supervised by an adult when using hand sanitizer
- **Remember to lead by example!**

## THE 6 STEPS TO PROPER HANDWASHING!

# WHEN TO STAY HOME FROM SCHOOL – SCREENING FOR COVID-19 SYMPTOMS

Children are in frequent contact with other individuals throughout the day. It's important to understand when it's safe to send your child to school to limit the spread of illnesses in these settings.

All York Region students, staff and essential visitors must complete the [COVID-19 School and Child Care Screening Tool](#) every day before attending school.

- If your child has developed **any** symptoms of illness (e.g., sore throat, cough, runny nose, fever, etc.) please refer to the [COVID-19 School and Child Care screening tool](#) for further guidance
- If your child has symptoms, they should follow the screening tool directions and not attend school
- If your child has tested positive for COVID-19, please follow [Public Health direction](#)

For further information, please call Access York at 1-877-464-9675 or consult with a health care provider. For 24-hour support from a Registered Nurse on medical symptoms, please contact Telehealth Ontario at 1-866-797-0000 or TTY: 1-866-797-0007 (for the deaf or hard of hearing).

# HOW TO PUT ON AND TAKE OFF YOUR FACE MASK

Face masks, when used safely and properly, can act as a barrier to prevent the spread of respiratory infections such as COVID-19. Wearing a face mask should be combined with other public health measures such as cleaning hands regularly, staying home when sick and coughing or sneezing into a mask, tissue or sleeved elbow.

**Teach your child these simple steps to safely put on and take off their face:**

## PUTTING IT ON

-  1. Wash your hands with soap and water for 15 seconds or use hand sanitizer
-  2. Put the mask on your face using the ear loops
-  3. Make sure it covers your nose, mouth and chin
-  4. Even though it's hard, **DON'T** touch the mask while it's on your face

## TAKING IT OFF

**Do not touch the front of your mask to remove it, use the ear loops**

-  1. Before taking your mask off, wash your hands with soap and water for 15 seconds or use hand sanitizer
-  2. Only use the ear loops to take your mask off. If you're wearing a throwaway mask, place it in a garbage bin
-  3. If you're wearing a cloth mask, make sure it is washed after each use and place safely in a bag in between uses
-  4. After taking your mask off, wash your hands with soap and water for 15 seconds or use hand sanitizer

# HOW TO STORE YOUR FACE MASK

Face masks help to protect those around you by acting as a barrier to prevent the spread of COVID-19. During the school day, children may remove their face mask for some activities such as consuming food and drink. It is important your child understands how to store their mask safely in between use.

## Follow these simple tips to help your child safely use and store their face mask:

- Remind your child to wash their hands with soap and water or hand sanitizer before removing their face mask
- Consider sending your child to school or child care with extra masks so they can be changed throughout the day if they become wet or dirty
- Have your child store their wet and dirty reusable mask in a labelled plastic bag until it can be washed
- Remind your child not to share or swap their face mask with others
