

Notice of New Traffic Control

Improvements and updates to the transportation network prepare York Region to meet today's needs and future growth.

AN INTERSECTION UPDATE IS HAPPENING IN YOUR COMMUNITY

The intersection of **Highway 27** and **Major Mackenzie Drive West/Humber Bridge Trail** is changing to a two-way stop. Currently this intersection is controlled by traffic signals.

Improvement:

With the new alignment of **Major Mackenzie Drive West**, traffic volume has significantly reduced at this intersection, and it no longer meets the traffic signal criteria set by provincial guidelines and York Region's Traffic and Pedestrian Signal Policy. Removing the traffic signals will help to improve traffic flow along **Highway 27**.

Duration:

June 2022

As with all road construction projects, work may be rescheduled due to weather. York Region will provide advance notice where possible.

Thank you for your patience during the construction period.

Impacts to travellers:

Travellers exiting the side streets, **Major Mackenzie Drive West** and **Humber Bridge Trail**, will come to a complete stop. Traffic on **Highway 27** will not.

Road work will include:

- Removing traffic signals and related signage, pavement markings and electrical systems
- Installing new signs, pavement markings and an overhead flashing beacon

Travellers may experience lane reductions while intersection changes are underway. Please drive safely through the work area and give workers plenty of space.

Access to homes and businesses will be maintained.

We will work to deliver this project with minimal disruption. If you have any questions or concerns, staff will be pleased to respond.
