

# Laying the foundation for York Region's DIGITAL INFRASTRUCTURE

## Installation of dark fibre along Baseline Road & Woodbine Avenue

York Region through YorkNet, continues to enhance and expand dark fibre in underserved areas of the Region. As part of the [Connect to Innovate Program \(CTI\)](#), YorkNet is currently expanding the dark fibre network to improve connectivity for underserved communities, primarily the Chippewas of Georgina Island First Nations and the community of Udora. Once the CTI section of the network is complete in 2021, YorkNet will make fibre connectivity available to internet carriers, who can in turn offer internet services to residents and businesses.

As part of this expansion, installation of dark fibre conduit is scheduled to take place in two sections:

- Along Baseline Road from Civic Road West to Woodbine Avenue
- Along Woodbine from Arlington Drive to Baseline Drive

### What you need to know:

Installation dates\*: Monday, July 20 for approximately six weeks

- Construction crews will be drilling and installing dark fibre along York Region property on Baseline Road & Woodbine Avenue in the Town of Georgina
- All work will take place on the north side of Baseline Road and the West side of Woodbine with construction vehicles working along the shoulder of the road as much as possible.
- No lane closures are expected as a result of this work
- Access to driveways will be maintained and roads in the area will remain open with no disruption
- There will be construction-related noise from equipment and trucks
- Some weekend work may be required

The map above shows the construction area.

**\*Please note:** Some work may be rescheduled or extended due to weather.

**If you have any questions about YorkNet's role in constructing the CTI route for York Region, please connect with**
