A Message from York Regional Council

The fifth edition of the Transportation Fact Book provides a wide range of data and statistics on transportation system usage, road capacity and travel patterns in The Regional Municipality of York as of 2013.

Published every two years since 2005, the Transportation Fact Book highlights York Region's transportation system, public transit, active modes of transportation such as walking and cycling, sustainable transportation programs and initiatives.

At a time when York Region continues to face significant population growth and transportation challenges, the Transportation Fact Book is an important resource for planning the transportation requirements of our new and evolving communities.

We encourage our municipal partners, stakeholders and residents to use this publication available on our website at www.york.ca to inform your work and discussions on transportation matters within the Region.

Regional Councillor
