

DAILY COVID-19 UPDATE: THE REGIONAL MUNICIPALITY OF YORK

TUESDAY, MAY 5, 2020 AS OF 4:00 P.M.

York Region Medical Officer of Health Dr. Karim Kurji provides an update related to COVID-19:

- 1,689 confirmed cases of COVID-19 in York Region (up 37 cases from May 4)
- 73 confirmed cases are currently hospitalized; 15 of which are in Intensive Care
- 89 cases among health care workers
- 797 resolved cases, which equals about 47%
- 39 institutional outbreaks under COVID-19 protocols
- 6 institutional outbreaks that have been declared over
- We regrettably report a total of 122 COVID-19 related fatalities to date. We extend our deepest condolences to the family and loved ones of these individuals.

Remember the importance of physically distancing and staying home unless it's for essential reasons, like grocery shopping. As we continue to see fewer cases reported every day, we need to maintain our vigilance and commitment to the public health measures that have been working. Physical distancing is helping slow the spread of COVID-19, so we all need to do our part for a while longer.

If you are feeling any symptoms of COVID-19 (fever, cough, shortness of breath) or are at greater risk of developing serious illness (70 years of age and above, immunocompromised), York Region Public Health asks you to please stay home and self-isolate. Additional information on seeking assessment at one of the three COVID-19 Assessment Centres in York Region is available at york.ca/covid19

The Regional Municipality of York applauds our local health care and front-line workers for their tireless commitment to supporting our community.

Note: Data quality is an ongoing process and may result in the more/less cases reported on a day-over-day basis

DAILY COVID-19 UPDATE: THE REGIONAL MUNICIPALITY OF YORK

THURSDAY, MAY 7, 2020 AS OF 5:00 P.M.

York Region Medical Officer of Health Dr. Karim Kurji provides an update related to COVID-19:

- 1,767 confirmed cases of COVID-19 in York Region (up 35 cases from May 6)
- 74 confirmed cases are currently hospitalized; 13 of which are in Intensive Care
- 90 cases among health care workers, of which 62 cases have resolved (69%)
- 843 resolved cases, which equals about 48%
- 40 institutional outbreaks under COVID-19 protocols
- 8 institutional outbreaks that have been declared over
- We regrettably report a total of 126 COVID-19 related fatalities to date. We extend our deepest condolences to the family and loved ones of these individuals.

Remember the importance of physically distancing and staying home unless it's for essential reasons, like grocery shopping. As we continue to see fewer cases reported every day, we need to maintain our vigilance and commitment to the public health measures that have been working. Physical distancing is helping slow the spread of COVID-19, so we all need to do our part for a while longer. This will be especially important as the province begins to open up some businesses this coming weekend.

If you are feeling any symptoms of COVID-19 (fever, cough, shortness of breath) or are at greater risk of developing serious illness (70 years of age and above, immunocompromised), York Region Public Health asks you to please stay home and self-isolate. Additional information on seeking assessment at one of the three COVID-19 Assessment Centres in York Region is available at york.ca/covid19

The Regional Municipality of York applauds our local health care and front-line workers for their tireless commitment to supporting our community.

Note: Data quality is an ongoing process and may result in the more/less cases reported on a day-over-day basis

DAILY COVID-19 UPDATE: THE REGIONAL MUNICIPALITY OF YORK

MONDAY, MAY 11, 2020 AS OF 4:00 P.M.

York Region Medical Officer of Health Dr. Karim Kurji provides an update related to COVID-19:

- 1,905 confirmed cases of COVID-19 in York Region (up 52 cases from May 10)
- 88 confirmed cases are currently hospitalized; 20 of which are in Intensive Care
- 249* cases among health care workers, of which 131 cases have resolved (53%)
- 917 resolved cases, which equals about 48%
- 33 institutional outbreaks under COVID-19 protocols
- 17 institutional outbreaks that have been declared over
- We regrettably report a total of 135 COVID-19 related fatalities to date. We extend our deepest condolences to the family and loved ones of these individuals.

Remember the importance of physically distancing and staying home unless it's for essential reasons, like grocery shopping. As we continue to see fewer cases reported every day, we need to maintain our vigilance and commitment to the public health measures that have been working. Physical distancing is helping slow the spread of COVID-19, so we all need to do our part for a while longer.

If you are feeling any symptoms of COVID-19 (fever, cough, shortness of breath) or are at greater risk of developing serious illness (70 years of age and above, immunocompromised), York Region Public Health asks you to please stay home and self-isolate. Additional information on seeking assessment at one of the three COVID-19 Assessment Centres in York Region is available at york.ca/covid19

The Regional Municipality of York applauds our local health care and front-line workers for their tireless commitment to supporting our community.

***Note:** Data quality is an ongoing process and may result in the more/less cases reported on a day-over-day basis or other changes to how cases are classified (e.g., municipality, acquisition etc...). These data quality activities have also resulted in the re-categorization of individuals. As such, as of May 11, 2020, the number of health care workers has increased by 160, a result of existing cases being re-categorized. These 160 cases were either outbreak related or due to having more complete occupation data available in iPHIS. Data quality activities do not increase or decrease total case counts.

DAILY COVID-19 UPDATE: THE REGIONAL MUNICIPALITY OF YORK

WEDNESDAY, MAY 13, 2020 AS OF 4:00 P.M.

York Region Medical Officer of Health Dr. Karim Kurji provides an update related to COVID-19:

- 829 active cases + 968 resolved cases + 142 fatalities = 1,939 confirmed cases of COVID-19 in York Region
 - Regretfully this update includes 3 COVID-19 related fatalities today
 - 77 confirmed cases are currently hospitalized; 18 of which are in Intensive Care
- The proportion of resolved cases in York Region is 50%
- York Region is currently supporting 33 institutional facilities responding to COVID-19 outbreaks
 - To date, 19 institutional outbreaks that have been declared over

Data quality is an on-going process to ensure the data presented by York Region Public Health is accurate, high quality and shows how COVID-19 is evolving in York Region. These necessary data quality activities may result in changes to the total number of cases reported on a day-to-day basis in the interactive graph below.

These changes are normal, expected and part of all infectious disease reporting and surveillance activities. The data we report on a daily basis is based on the most up-to-date information we have from our case, contact and outbreak management activities. York Region Public Health continues to be a leader across the province in the volume and depth of COVID-19-related data made publically available.

Remember the importance of physically distancing and staying home unless it's for essential reasons, like grocery shopping. We need to maintain our vigilance and commitment to the public health measures in place. Physical distancing is helping slow the spread of COVID-19.

If you are feeling any symptoms of COVID-19 (such as fever, cough, shortness of breath) or are at greater risk of developing serious illness (70 years of age and above, immunocompromised), York Region Public Health asks you to please stay home and self-isolate. Additional information on seeking assessment at one of the three COVID-19 Assessment Centres in York Region is available at york.ca/covid19

The Regional Municipality of York applauds our local health care and front-line workers for their tireless commitment to supporting our community.

DAILY COVID-19 UPDATE: THE REGIONAL MUNICIPALITY OF YORK

WEDNESDAY, MAY 20, 2020 AS OF 5:00 P.M.

York Region Medical Officer of Health Dr. Karim Kurji provides an update related to COVID-19:

- 846 active cases + 1,101 resolved cases + 168 fatalities = 2,115 confirmed cases of COVID-19 in York Region
 - Regretfully this update includes 4 COVID-19 related fatalities today
 - 77 confirmed cases are currently hospitalized; 20 of which are in Intensive Care
- The proportion of resolved cases in York Region is 52%
- York Region is currently supporting 22 institutional facilities responding to COVID-19 outbreaks
 - To date, 34 institutional outbreaks that have been declared over

Data quality is an on-going process to ensure the data presented by York Region Public Health is accurate, high quality and shows how COVID-19 is evolving in York Region. These necessary data quality activities may result in changes to the total number of cases reported on a day-to-day basis in the interactive graph below.

These changes are normal, expected and part of all infectious disease reporting and surveillance activities. The data we report on a daily basis is based on the most up-to-date information we have from our case, contact and outbreak management activities. York Region Public Health continues to be a leader across the province in the volume and depth of COVID-19-related data made publically available.

Remember the importance of physically distancing and staying home unless it's for essential reasons, like grocery shopping. We need to maintain our vigilance and commitment to the public health measures in place. Physical distancing is helping slow the spread of COVID-19. **If you cannot maintain physical distancing between yourself and others, you should wear a two-layer non-medical mask or face covering.**
