

How to correctly use hand sanitizer

Important Tips:

- Use hand sanitizer when:
 - soap and running water are not available
 - hands are not visibly soiled
- Use moistened towelettes followed by hand sanitizer when hands are visibly dirty and soap and water are not available
- Choose an alcohol-based hand sanitizer that contains between 60% and 90% alcohol
- Children should be supervised when using hand sanitizer product
- Do not apply hand sanitizer near an open flame

Note: alcohol-based hand sanitizer dispensers must not be placed within 15cm (six inches) of a source of ignition (e.g., electrical outlet, light switch).
